

SYSTEM AND METHOD FOR DISPLAYING A THREE-DIMENSIONAL IMAGE
OF AN ORGAN OR STRUCTURE INSIDE THE BODY

ABSTRACT

- 5 A system for displaying a three-dimensional image of an organ or structure inside the
body includes a processor configured to be communicatively coupled to a probe, the
probe being configured to be located in or adjacent to the organ or structure inside the
body. The system also includes memory coupled to the processor and configured to
store image data pertaining to the organ or structure inside the body. The system also
10 includes a three-dimensional display coupled to the processor and configured to
simultaneously display the three-dimensional image and a representation of the probe.
